

## FOR IMMEDIATE RELEASE

*Just Published: Chemistry Comes Alive! Volume 6: Laboratory Techniques*

**Chemistry Comes Alive! Volume 6: Laboratory Techniques (CCA! 6)** contains more than 600 QuickTime movies and more than 3600 still images that illustrate laboratory procedures and techniques. CCA! 6 is a comprehensive resource for high school chemistry, general chemistry, analytical chemistry, and organic chemistry laboratory courses. The laboratory equipment and techniques demonstrated are those that students typically need to learn.

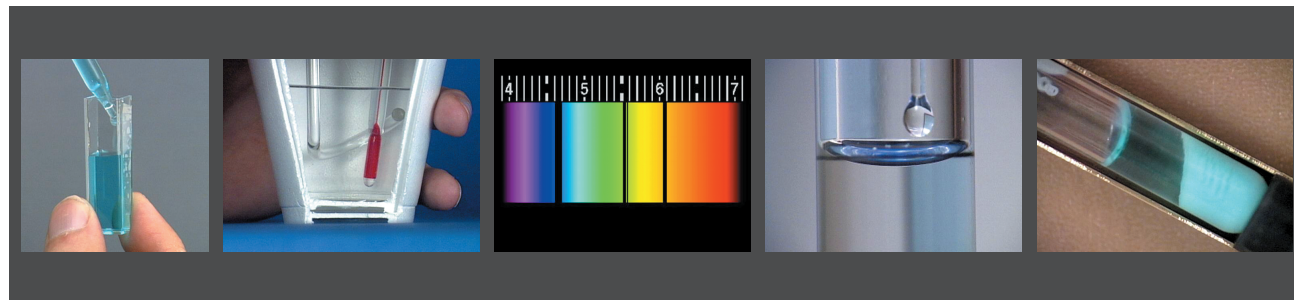

**Chemistry Comes Alive! Volume 6: Laboratory Techniques** is the 6th in a series of CD-ROMs containing high quality QuickTime movies and thousands of still pictures covering a broad range of general chemistry, organic chemistry, and biochemistry topics and laboratory procedures. For a more detailed description of the contents of all six Chemistry Comes Alive! CDs, visit JCE Online at <http://jchemed.chem.wisc.edu/JCESoft/CCA/>.

### What to Order

- Special Issue 30: Chemistry Comes Alive! Volume 6 CD-ROM. Price for a single user on a single machine: \$75 U.S./\$95 non-U.S. LANs (up to 12 users): \$300 U.S./\$320 non-U.S. Prices for libraries and wide area networks or other information may be obtained by contacting JCE Software. This is a single CD-ROM for both Macintosh and Windows.
